2016.07 Cisco Official: 400-051 Exam Questions New Updated! [Braindump2go](#) Offers Free 400-051 PDF & 400-051 VCE 454Q&As for Free Download Today! [NEW QUESTION 71 - NEW QUESTION 80: 1.](#) | 2016.07 New Cisco 400-051 PDF & 400-051 VCE 454Q&As Dumps: <http://www.braindump2go.com/400-051.html> [100% Exam Pass Guaranteed!] 2. | 2016.07 Latest Cisco 400-051 Exam Questions PDF - Google Drive: <https://drive.google.com/folderview?id=0B272WrTALRHcV0V4N2pvOUpFcUk&usp=sharing>

**QUESTION 71** Which statement describes the call recording operation on Cisco Unified Contact Center Express call agents that use Cisco IPPA? A. Recording is facilitated via desktop monitoring on supported IP phones. B. Automatic recording is supported. C. Only G.711 codec is supported. D. Only SPAN port monitoring is supported. E. Call recording is not supported on Cisco Unified CCX call agents that use Cisco IPPA. Answer: D Explanation: There is no mechanism created as of now to record the call so we first span and record it from packet capture or from third party software.

**QUESTION 72** Which protocol that is used between Cisco IM and Presence and Cisco Unified Communications Manager is responsible for the exchange of phone state presence information? A. AXL/SOAP. B. CTI/QBEC. C. SIP/SIMPLE. D. LDAP. E. XMPP Answer: C Answer: C Explanation: To provide interoperability between communications systems, SIP is the protocol leveraged. Enterprise Presence solutions need to provide for a uniform definition of the main communication services such as IM, voice, video, e-mail, web calendaring, and so on, while SIP delivers the necessary features.

**QUESTION 73** Refer to the exhibit. In this high-availability Cisco IM and Presence deployment with three subclusters, the first user is assigned to server 1A; the second user is assigned to server 2A; and the third user is assigned to server 3A. Assume that the Cisco IM and Presence is set to Active/Standby mode, to which server should the fourth user be assigned? A. 1A. B. 3C. C. 1B. D. 2A. E. 3A Answer: A Explanation: This deployment model provides the same level of redundancy and high availability as outlined in the "Balanced Redundant High-Availability Deployment" section in this chapter. The only difference is that users are not deployed in a balanced fashion, but rather all reside on the primary server in the subcluster, and the backup server is there as a standby option if a node failure occurs.

**QUESTION 74** Which two enterprise presence domains can federate with Cisco IM and Presence by using SIP? (Choose two.) A. AOL. B. Microsoft OCS. C. IBM Sametime. D. Cisco WebEx Connect. E. Google Talk. F. Cisco Unified Presence 8.X Releases Answer: A B Explanation: Microsoft Lync and OCS support presence services with sip as well as AOL so to sip is easy to troubleshoot and feasible for signaling that's why cisco federate these with sip.

**QUESTION 75** Which statement describes the external database requirement for the Cisco IM and Presence permanent group chat feature? A. All nodes in a Cisco IM and Presence cluster can share a physical external database. B. All nodes in a Cisco IM and Presence cluster can share a logical external database. C. Each node in a Cisco IM and Presence cluster must have its own physical external database. D. Each node in a Cisco IM and Presence cluster must have its own logical external database. E. An external database is not mandatory. Answer: D Explanation: When you configure an external database entry on IM and Presence, you assign the external database to a node, or nodes, in your cluster as follows: For the Compliance feature, you require at least one external database per cluster. Depending on your deployment requirements, you can also configure a separate external database per node. For the Permanent Group Chat feature, you require a unique external database per node. Configure and assign a unique external database for each node in your cluster. If you deploy both the Permanent Group Chat and Compliance features on an IM and Presence node, you can assign the same external database to both features.

**QUESTION 76** Which external database software is required for the Cisco IM and Presence compliance feature? A. MySQL. B. EnterpriseDB. C. MSSQL. D. SQLite. E. PostgreSQL Answer: E Explanation: [http://www.cisco.com/en/US/docs/voice\\_ip\\_comm/cups/8\\_0/english/install\\_upgrade/databa se/guide/Preparing\\_database\\_setup.html#wp1053954](http://www.cisco.com/en/US/docs/voice_ip_comm/cups/8_0/english/install_upgrade/databa se/guide/Preparing_database_setup.html#wp1053954)

**QUESTION 77** Which Cisco IM and Presence service is responsible for logging all IM traffic that passes through the IM and Presence server to an external database for IM compliance? A. Cisco Presence Engine. B. Cisco Serviceability Reporter. C. Cisco Sync Agent. D. Cisco XCP Connection Manager. E. Cisco XCP Message Archiver Answer: E Explanation: The Cisco Unified Presence XCP Message Archiver service supports the IM Compliance feature. The IM Compliance feature logs all messages sent to and from the Cisco Unified Presence server, including point-to-point messages, and messages from adhoc (temporary) and permanent chat rooms for the Chat feature. Messages are logged to an external Cisco-supported database.

**QUESTION 78** Which two statements about the Cisco UC on UCS specs-based virtualization support model are true? (Choose two.) A. It has a configuration-based approach. B. It has a rule-based approach. C. It has less hardware flexibility compared to the third-party server specs-based support model. D. It has less hardware flexibility compared to the UC on UCS TRC support model. E. VMware vCenter is optional with this support model. Answer: B C Explanation: [http://docwiki.cisco.com/wiki/UC\\_Virtualization\\_Supported\\_Hardware#UC\\_on\\_UCS\\_Test\\_e\\_d\\_Reference\\_Configurations](http://docwiki.cisco.com/wiki/UC_Virtualization_Supported_Hardware#UC_on_UCS_Test_e_d_Reference_Configurations)

QUESTION 79 Which definition is included in a Cisco UC on UCS TRC? A. required RAID configuration, when the TRC uses direct-attached storage B. configuration of virtual-to-physical network interface mapping C. step-by-step procedures for hardware BIOS, firmware, drivers, and RAID setup D. configuration settings and patch recommendations for VMware software E. server model and local components (CPU, RAM, adapters, local storage) by name only; part numbers are not included because they change over time Answer: A Explanation: Definition of server model and local components (CPU, RAM, adapters, local storage) at the orderable part number level. Required RAID configuration (e.g. RAID5, RAID10, etc.) - including battery backup cache or SuperCap - when the TRC uses DAS storage Guidance on hardware installation and basic setup. Design, installation and configuration of external hardware is not included in TRC definition, such as: Configuration settings, patch recommendations or step by step procedures for VMware software are not included in TRC definition. Infrastructure solutions such as Vblock from Virtual Computing Environment may also be leveraged for configuration details not included in the TRC definition. QUESTION 80 Which capability is supported by LLDP-MED but not by Cisco Discovery Protocol? A. LAN speed discovery B. network policy discovery C. location identification discovery D. power discovery E. trust extension Answer: A Explanation: LLDP-MED supports both LAN speed and duplex discovery. Cisco Discovery Protocol supports duplex discovery only, but this limited support is not seen as a problem because if there is a speed mismatch, LLDP-MED and Cisco Discovery Protocol cannot be exchanged and thus cannot be used to detect the mismatch. !!!RECOMMEND!!! 2016 Jul.
